Skills

HTML

CSS

JavaScript

Bootstrap

React.js

Node.js

Express.js

MongoDB

Git/GitHub

MySQL

Education

B.E - ECE

Narasu's Sarathy Institute of Technology

Aug 2016 - Sep2020

Languages

Tamil - Native Speaker

English - Fluent

Summary

- Good understanding of the Document Object Model (DOM) and its functions.
- Hand on using React Hooks to use state and lifecycle methods inside functional component.
- React Router to control the various React component path locations.
- Package management was handled by NPM while source control was handled by Git.
- Used Postman to test the API and used a version control tool.
- Making websites with HTML/HTML5, CSS/CSS3, JavaScript, and React Js + Redux
- Built a single-page web application with React.js, Redux, Express, Node.js, a REST API, and MongoDB.

Experience

2021-2022: Combat Vehicles Research and Development
Establishment (CVRDE)-DRDO, Avadi, Chennai.

Graduate Apprentice Trainee

Project

1. Mobile Shop App (March - April 2023)
 - In this app, we need to implement authentication and perform CRUD operations.
 - <https://gleaming-macaron-192bb7.netlify.app>
2. Equipment Rental Portal April - May 2023)
 - Users of the equipment rental platform may rent a product by using the test Razorpay mode. This application offers user and administrator authentication.
 - <https://nimble-babka-3e85ad.netlify.app>
3. Tournament app (May - June 2023)
 - The tournament app can be used to create a tournament and add participants to it. Once the participants have been added, you can select a winner based on the rules of the tournament.
 - <https://tournament-game.netlify.app>
4. Zoom Metting Clone (June - July 2023)
 - The Zoom Meeting app allows you to create a video call, chat, and screen share with login credentials
 - <https://main--unrivald-froyo-c6cf87.netlify.app>

Certication

Full Stack Development (MERN), Guvi Geek Network, IIT Madras
